

Existing Condition

View looking south from SR 127 at Oliphant Ridge WRA.

Simulated Condition

Nearest turbine feature is approximately 1.1 miles away from the viewpoint.

NOTES:

Visual simulation (which includes all 1,000 possible turbine locations) is shown for demonstration purposes only. Some turbines shown in this simulation could not and would not be built because of their proximity to each other and other micro-siting considerations. Final design may change pending review.
