

Existing Condition

View looking west from Patit Campsite on Patit Road at Tucannon WRA.

Simulated Condition

No turbines are visible from the viewpoint.

NOTES:

Visual simulation (which includes all 1,000 possible turbine locations) is shown for demonstration purposes only. Some turbines shown in this simulation could not and would not be built because of their proximity to each other and other micro-siting considerations. Final design may change pending review.

10:002764.RE11.02/8-12-09

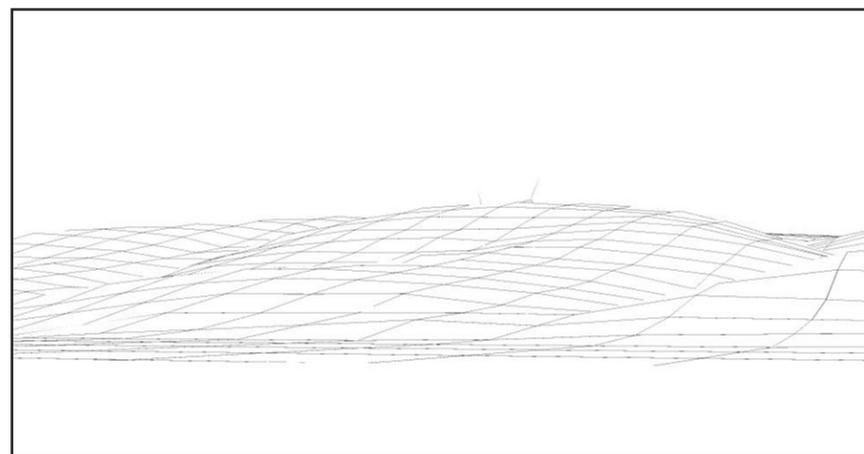

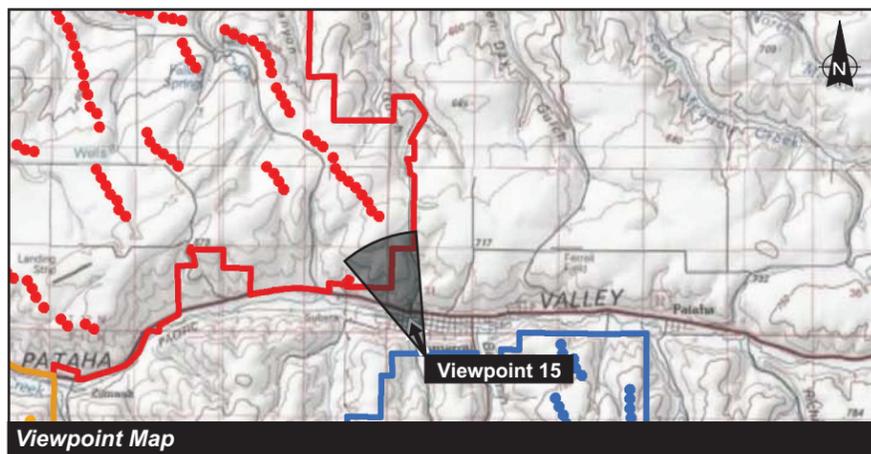

Existing Condition

View looking northwest from the intersection of Arlington and 6th streets at Kuhl Ridge WRA.

Simulated Condition

Nearest turbine feature is approximately 1.5 miles away from the viewpoint.

NOTES:

Visual simulation (which includes all 1,000 possible turbine locations) is shown for demonstration purposes only. Some turbines shown in this simulation could not and would not be built because of their proximity to each other and other micro-siting considerations. Final design may change pending review.

Existing Condition

View looking west from Dutch Flats Road at Dutch Flats WRA and Hopkins Ridge.

Simulated Condition

Nearest turbine feature is approximately 0.7 mile away from the viewpoint.

NOTES:

Visual simulation (which includes all 1,000 possible turbine locations) is shown for demonstration purposes only. Some turbines shown in this simulation could not and would not be built because of their proximity to each other and other micro-siting considerations. Final design may change pending review.

10:002764.RE11.02/8-12-09

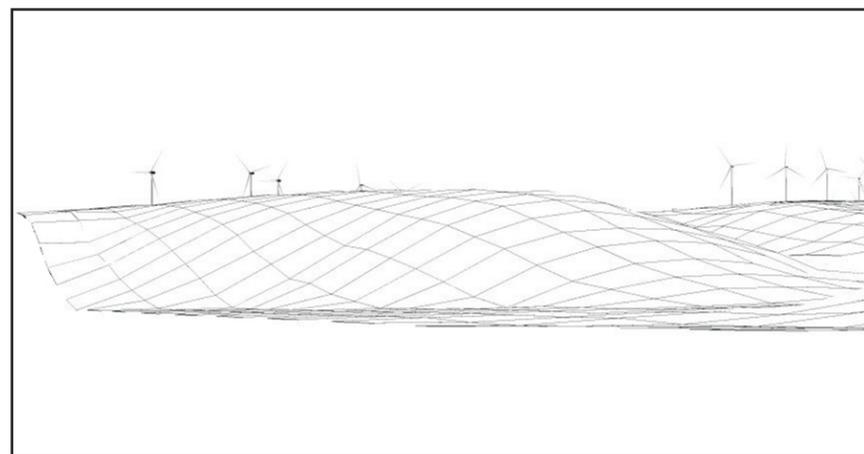

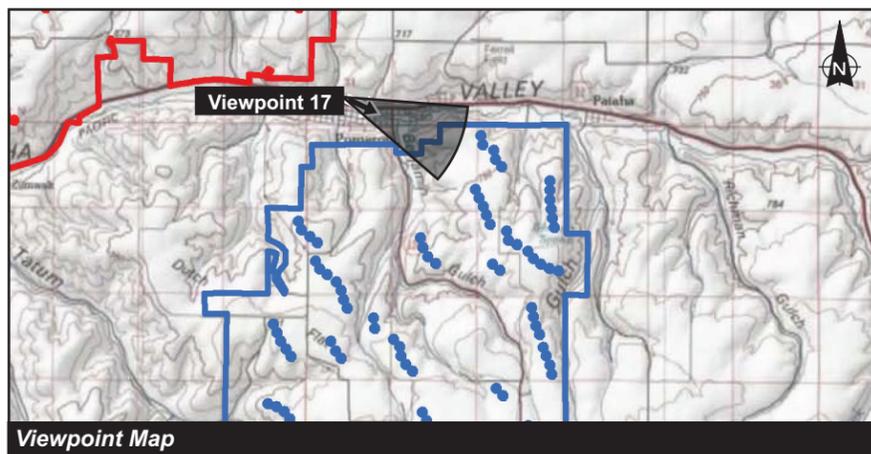

Existing Condition

View looking east from Main and 10th streets towards the Dutch Flats WRA.

Simulated Condition

Nearest turbine feature is approximately 1.4 miles away from the viewpoint.

NOTES:

Visual simulation (which includes all 1,000 possible turbine locations) is shown for demonstration purposes only. Some turbines shown in this simulation could not and would not be built because of their proximity to each other and other micrositing considerations. Final design may change pending review.

10:002764.RE11.02/8-12-09

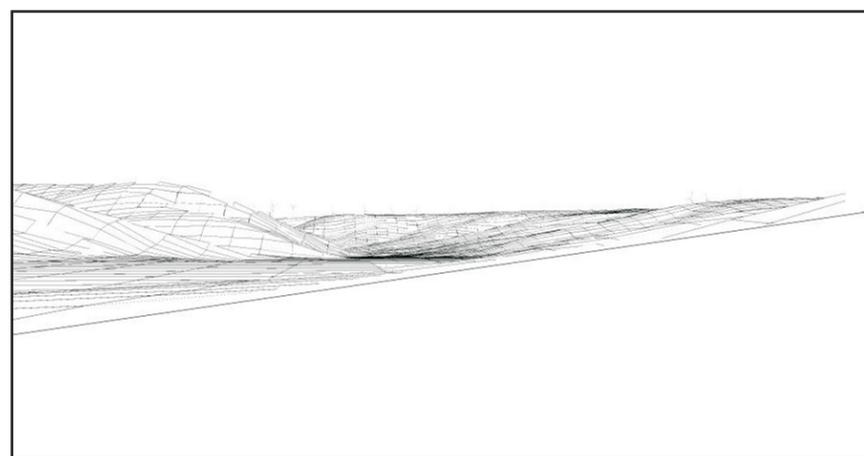

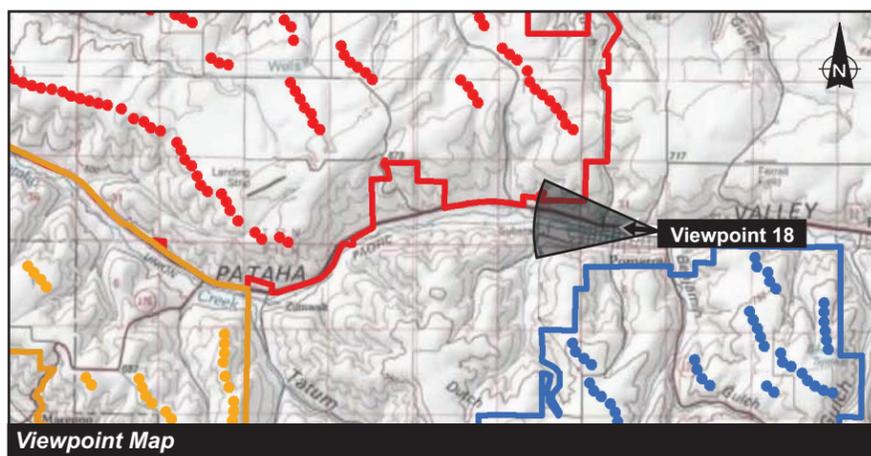

Existing Condition

View looking west from Main and 10th streets towards the Kuhl Ridge WRA.

Simulated Condition

Nearest turbine feature is approximately 4.2 miles away from the viewpoint.

NOTES:

Visual simulation (which includes all 1,000 possible turbine locations) is shown for demonstration purposes only. Some turbines shown in this simulation could not and would not be built because of their proximity to each other and other micro-siting considerations. Final design may change pending review.
